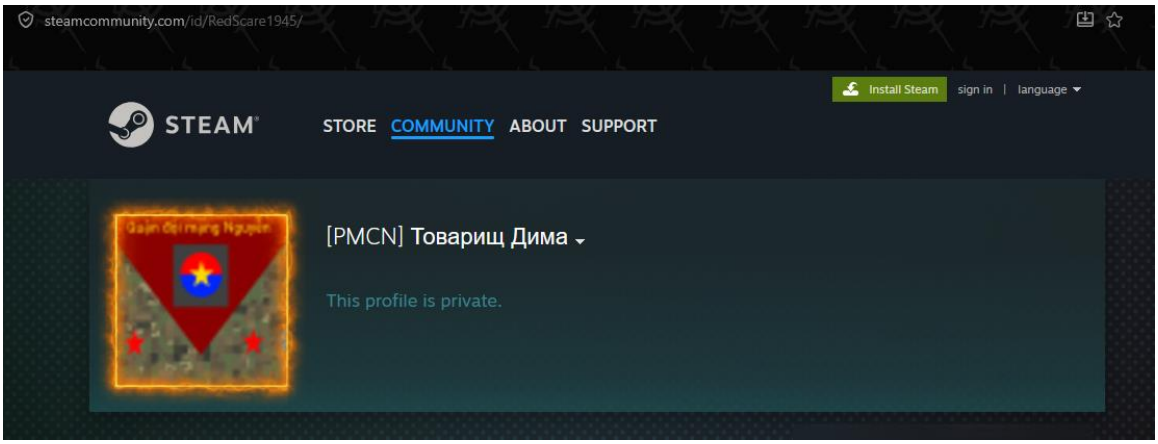
other steam account id 76561198320110609

steam account id (one of his many accounts) 76561198316024506



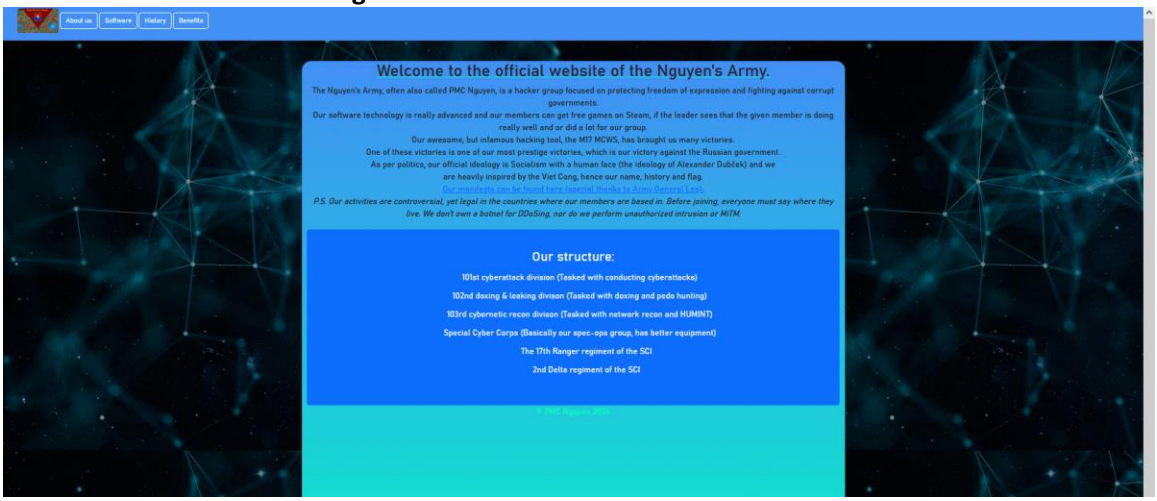
his steam pfp is the same as the icon for their groups main groupchat on steam

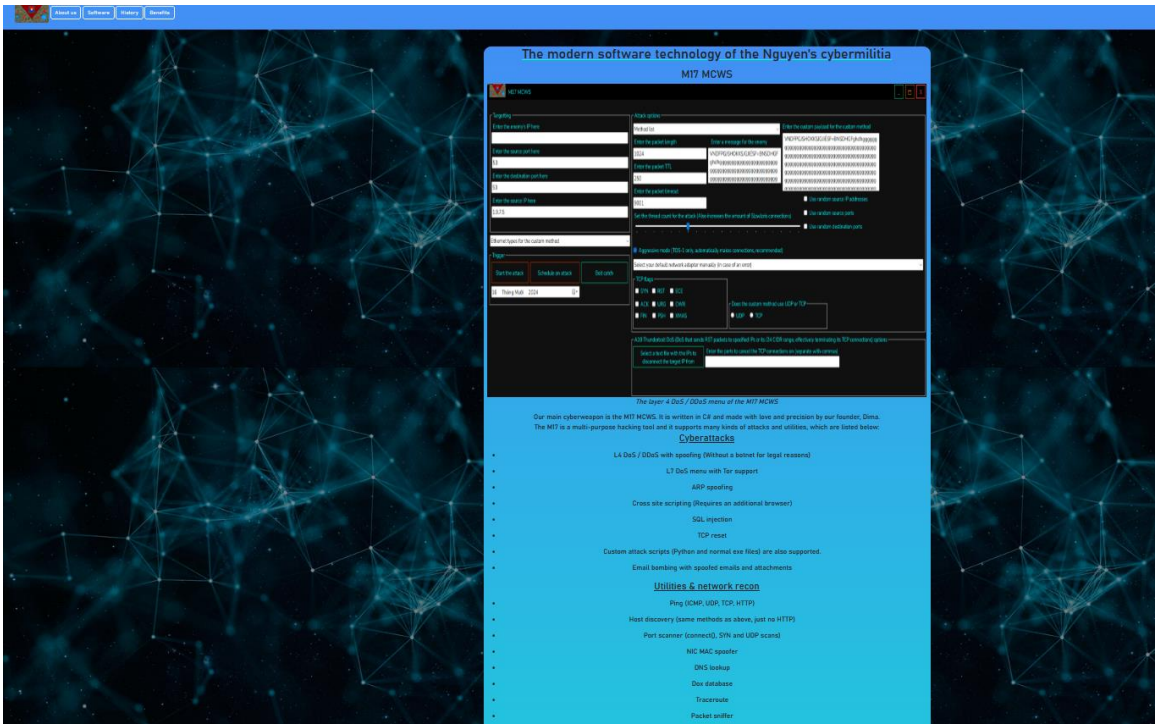
the pfp he used (lower quality sadly)

higher quality version from his github

https://pmcnguyen.neocities.org/

archive of their site incase it gets deleted





Comparison between the M17 and the most popular (D)DoS tool on GitHub (MHDDoS)

	(D)DoS methods	Programming language	Custom utilities	IP spoofing
M17	28	C# (faster)	9	Yes
MHDDoS	56	Python (slower)	6	Yes

CyberMask 7 IPS

The CyberMask 7 intrusion prevention system is a DoS / DDoS + ARP spoofing mitigation tool. It uses a secret algorithm in order to capture the "bad" packets and block the source IPs. It also uses a "counter-attack" mechanism to reverse ARP spoofing attacks right as they come. You need to use a DMZ (preferable) or port forwarding in order to use it properly. Issued only to SCI units.

Vz. 23 IP camouflage

This is another personal protection system that masks your IP among fake ones. You just need to enter 9 different IPs (presumably around your location) and start the tool in the Vz. 24 cyber-uniform. Issued only to SCI units.

AP vz. 24

Short for Armádní pistole vzor 24, Czech for "Army pistol model 24", the AP vz. 24 is a universal mobile cyberweapon system. It has similar features to the M17 MCWS, however, some features require the phone to be rooted. It is written in C# and XAML, utilizing MAUI technology and .NET 9.0.

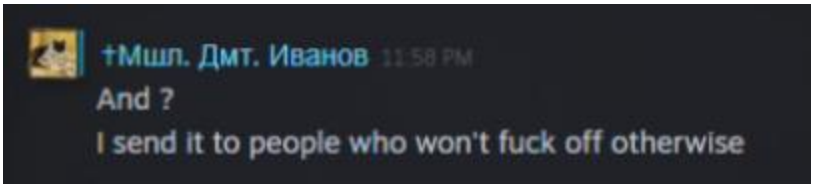
how the group works (this is for any law enforcement reading this) is they will find young children (mostly aged 10-13) and fully lie to them about the group to get them to join like for example "fighting pedophilia" or "fighting fascism" or "fighting (insert country the owner does not like such as israel or russia)" and they will make the kid to do something illegal such as ddosing or swatting or doxxing to prove loyality to the group and will take screenshots of it too use as future blackmail if the kid ever wants to leave the group or go aganist the group. they also engage in massive spam of gore in group chats filled with kids and using the survive "emkei.cz" to send bomb threats and rape threats. i also have a screenshot of the owner telling me he fucking reported me to the fbi to try and swat me. not only this but awhile ago the owner to try and scare someone posted fucking cp in a groupchat filled with kids

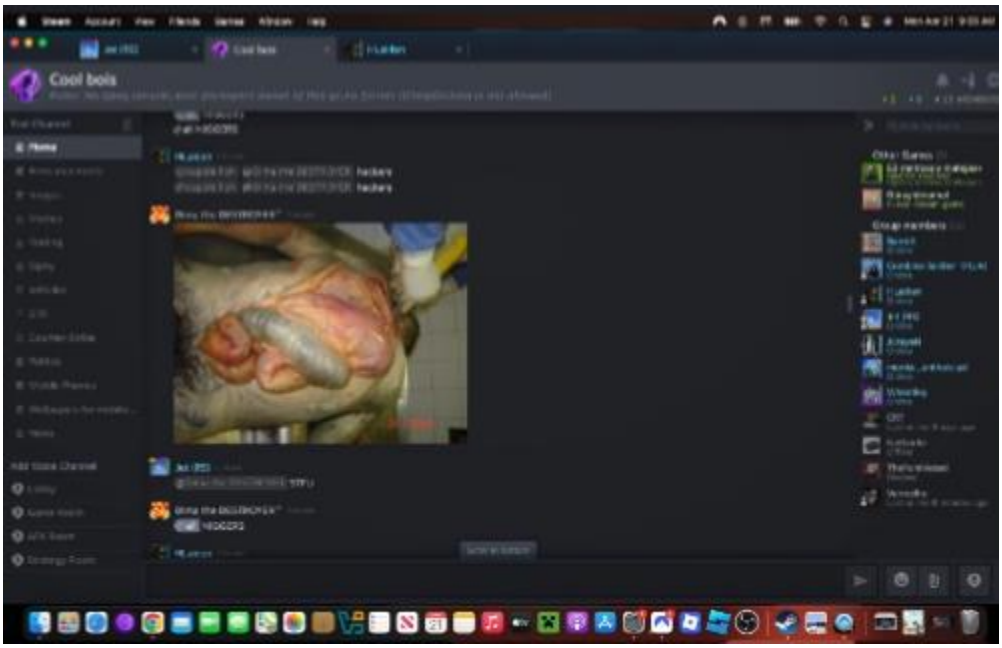
(i have a screenshot of him admitting to this and defending it which will be included later in this document)

most of these are from a video recording of a group chat i recorded the chatroom instead of taking proper screenshots to save time now that i look back on it. that was stupid cause all of these are insanely low quality

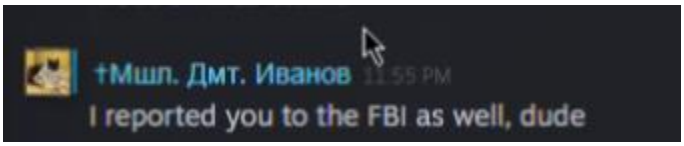
context

this was awhile ago when he and some of his group members added me to a gc to threaten me with swatting/doxxing cause i made fun of his group and this is him responding to me calling him out for sending gore to children in a groupchat

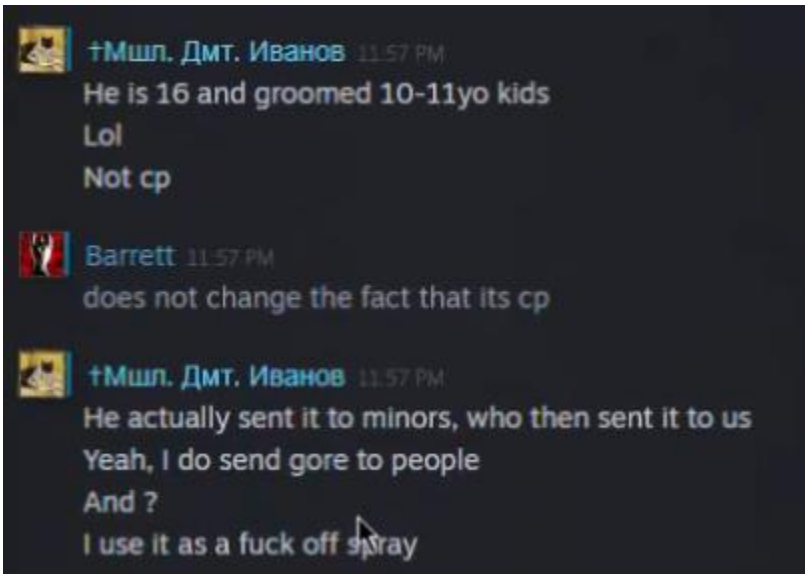




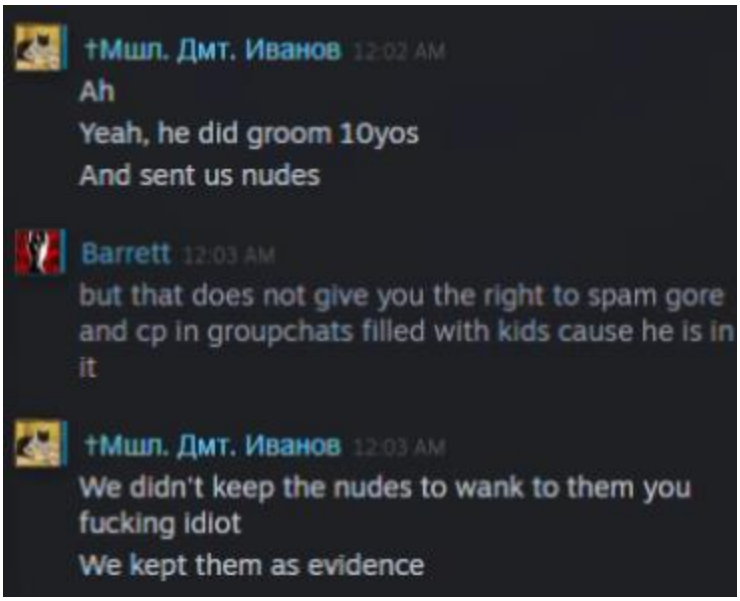
the owner of the group sending gore (i lost the higher quality version i'll replace this with it if i can find it)

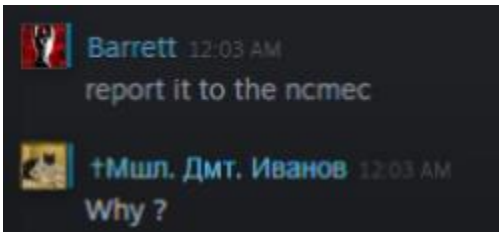


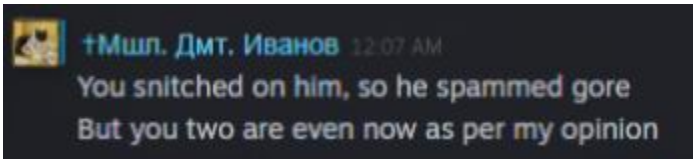
the owner of the group saying he made a false report to the fbi



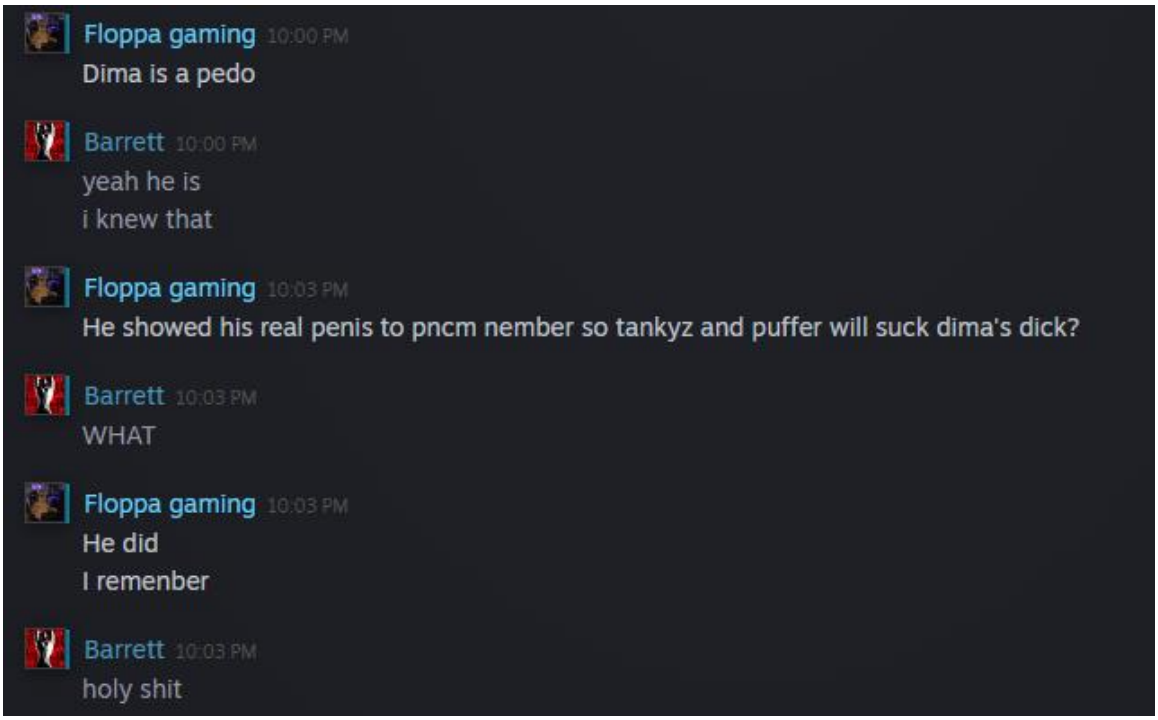
him admitting he has cp



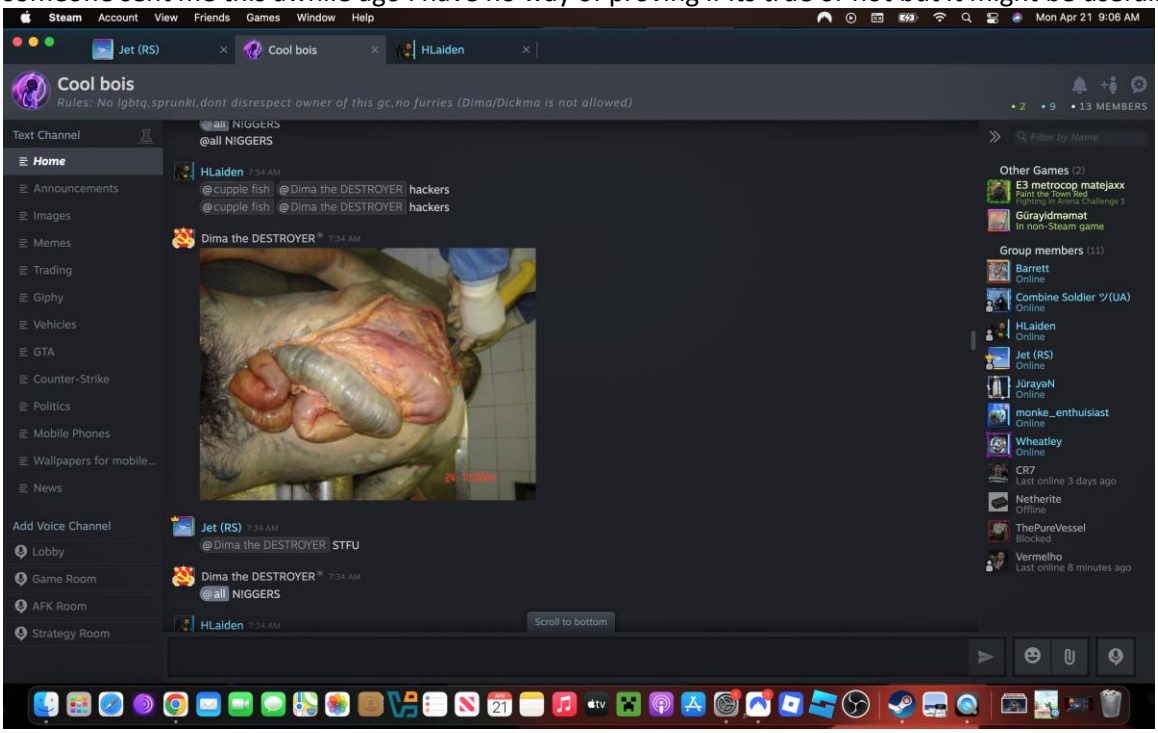




the owner of the group defending someone who made a account to impersonate me and spammed gore with it



someone sent me this awhile ago i have no way of proving if its true or not but it might be usefull

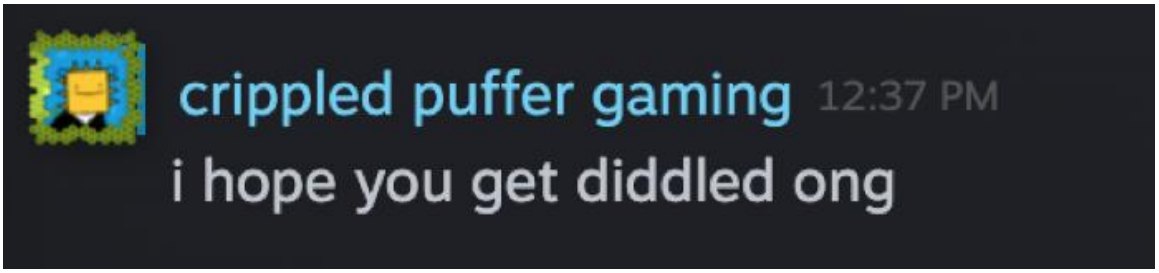


higher quality version of that one screenshot i mentioned a bit ago

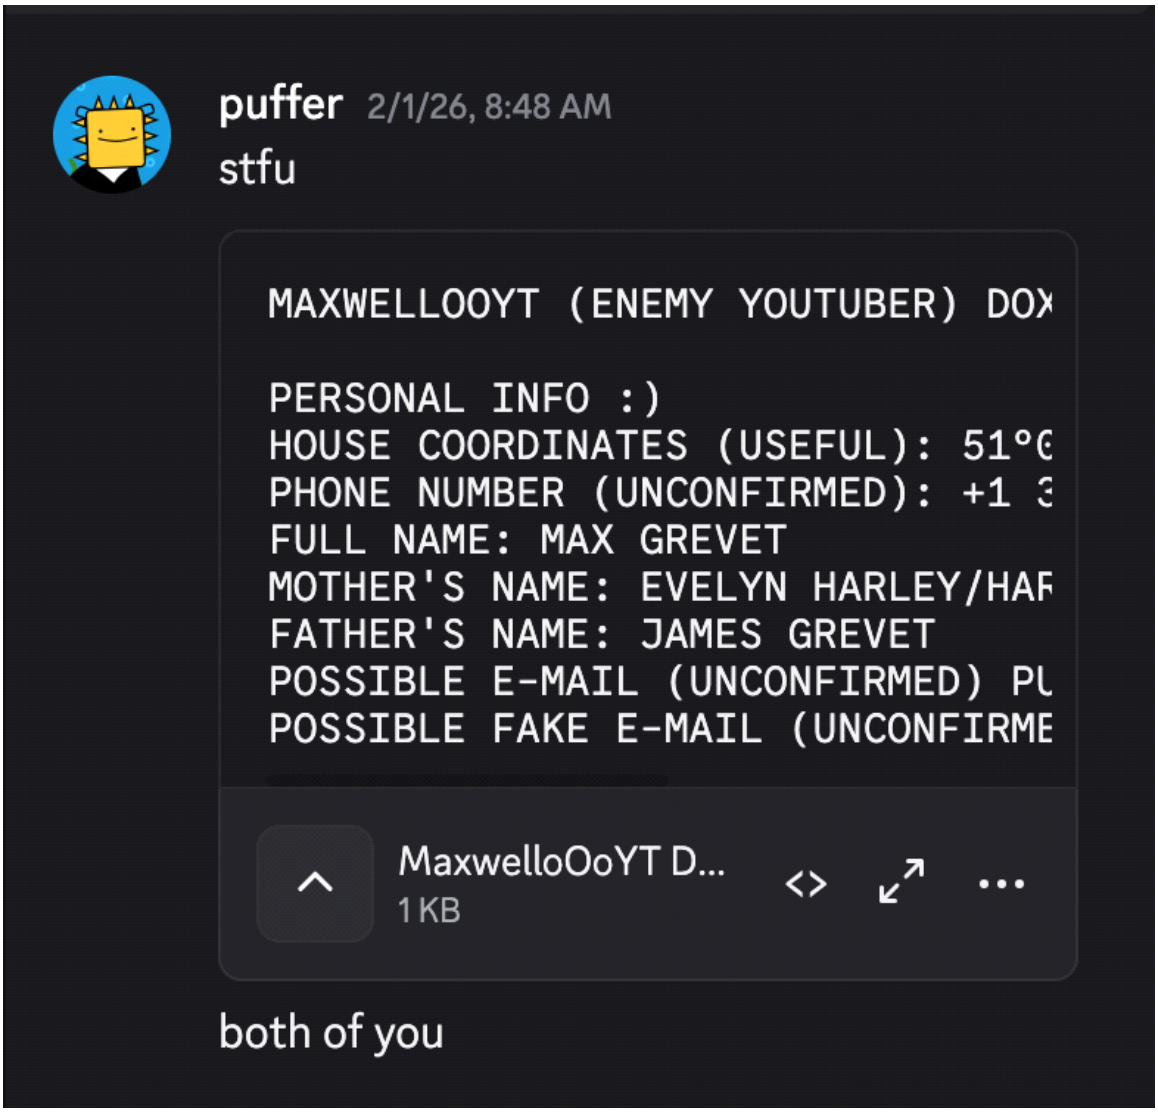
one of the other members of the group posting porn in a groupchat that was mainly made up of kids (mainly known as "puffer" "pufferfish gaming" "crippled puffer fish gaming" possible real name "alex fudeco/Federico/Fiudeco"(i cant remember his last names spelling) located in italy) i dont have his steam account he had made several new ones https://steamcommunity.com/id/gemmy333333333333333333/ i think this might be him since the id having the word "gemmy" in it aligns with his obsession of the site "soyjak.st" also known as the sharty. **http://steamcommunity.com/profiles/76561199543891371 real steam id just incase it is him and he changes it**

him telling me to off myself cause of me saying what he did

him sending more porn in the same gc as earlier (according to him its cropped and spoiled so he did nothing wrong)



?????



him doxxing a 10-12 year old

more screenshots in order
