

The precipice of two futures.

Our Nation is at the precipice of two futures, one of greatness, of light and of victory, and one of death, defeat and darkness for our people. As the last great generation of our race we are the final line of defense, the final chance for victory or the ultimate defeat. We have become strangers within our own homelands, across every street we can see foreigners who have come to reap the benefits of our lands and provide nothing but fodder for a failing and degenerate system. A satanic cabal rules over us with deceit and lies, sedating us with our desires and slowly replacing us with a more servile horde from the third world. Wake up my fellow Caucasians for the final call is made, and the end of our civilization is nearing.

The current situation: Take a look around you, in your streets and on the news, at the demographics, and at the world. The birth rates of Europe have collapsed, America is expected to follow soon, meanwhile the population of Africa, India and the middle east have exploded. One may think that this is a mere coincidence but it is nothing of the sort. In a devilish plan created after the second world war the Judaic people seeking revenge upon the Christian and Caucasian nations for their rebellion against their order, the Jewish cabal saw that the population of the world was exploding and utilizing this they managed to convince not just the leaders of the nations of the west but also the people that there would infact be too many people and so began the great replacement. Mass propaganda was created to convince western populations to cease having children, they engineered the sexual revolution to keep people from having proper families, they legalized and promoted abortion to kill white children before they were even born in the greatest genocide in world history, right under our noses. Meanwhile at the same time that all of this was happening in the west the 3rd world saw no such propaganda or movements allowing their populations to explode to unimaginable numbers. All that had to be done was wait

and soon the replacement would be done as the western civilizations peoples died off and the global south grew and grew. The consumeristic and decadent system of capitalism kept the people sedated for years, turning their eyes away from the truth in pursuit of wealth and hedonistic goals while this took place, that very system that kept our people sedated is the very one that today too replaces us, justifying the importation of the third world for economic reasons stating that its "the only way we can stop the economy from collapsing". If the system is to collapse then the system was flawed from the start yet still we are forced to march on fueling this machine that seeks to destroy and replace us.

The solution: While the situation may seem dire and victory appears ever more hopeless with each day but there is still hope just on the horizon. We must wake up to the system and revolt against its evils. Organizing our people is the first step, we must wake up those who do not know to the truth, to tell them of these evils that are taking place against us. Second is the actual taking of power, though it may seem futile elections while often controlled can still get the word out, on top of this the Judaic menace cannot have his eye everywhere administering every election, facet of government, protest and revolt around the world which allows us to slip through the cracks. we shall do like the third worlders have done to us, utilize the small positions in government and local government to benefit our people. Violence as a method I shall not comment heavily on because of numerous reasons but be wary of retaliation. A bloody revolution might or might not work but I cannot endorse one because I don't want green glowing men to appear at my door. Regardless of how total power is secured to setup a country for our nation is the next step, to organize a civilization based upon the basis of a shared culture, nation and race is the best model possible. A strong leader or extremely unified and loyal government is also required, other forms of government are vulnerable to sedation, sluggishness and

infiltration, the very things killing our current society. On the topic of economics corporatism with high regulation is preferable, while a free market may be optimal for growth and innovation it opens a door for exploitation and consumeristic degeneracy, regulation by the state is like a diet for the economy, keeping the corporations in line protecting the people from exploitation and temptation while allowing the grievances of all sides to be heard, ending the conflict of the classes. Lastly is the topic of those who have invaded our nation and the satanic few who currently run it. I believe that the third worlders are merely tools of the cabal and should not be viewed with strong contempt for they do not know what they do, they are like drones who merely act to serve their overlord due to their genetic predisposition to a lower state of thinking and violence, for this reason they should merely be deported back to their homelands and to their own nations, where they may live out their lives as they always have away from us. Rebuilding our nations shall be no small task after the decimation that was brought upon us but by instilling proper societal values we may prevail and return to the former glory of our peoples, and eventually hopefully go beyond that.

The final victory is on the horizon and you are to be a part of it, spread the word and work towards our national salvation for without this we are to be doomed to a civilizational fate that will echo through the ages, marking the victory of evil and the destruction of our nation.
