I'm going to out myself as an offsite here for a second, why do offsites like soytan so much? I like her too but holy shit some of them are really weird about her. On a 'cord group chat I'm in with other people vaguely into soyculture I've seen niggers thirst over her and I'm sure if I were to go there and mention her right now niggers would start to goon to her for like 5 minutes before going back to talking about homestuck or some shit

First time isn't it, Nusoi? Well, we here on the Sharty do it a little differently. There's no updoots or downdoots, there's no likes or shares. It's just pure unfiltered imageboard culture. If you can't deal with that, then leave... Or if you'd rather stay, you better have your wits about you, us oldfags don't play when it comes to nusois. You're our prey, and it's your job to survive.
